

Story Generator AI

USER MANUAL

ACKNOWLEDGEMENTS

First and foremost, I want to express my deepest gratitude to my parents. Your unwavering support, encouragement, and belief in me have been the cornerstone of my journey. You've not only provided the resources and opportunities but also the love and encouragement that kept me going, even when the going got tough.

Dr. Ken Khan, your expertise, patience, and willingness to share your knowledge have been instrumental in shaping my understanding of app development. Your guidance extended beyond coding, encompassing life lessons that I will carry with me always.

To my group members, thank you for the countless hours we spent collaborating, brainstorming, and debugging together. Our shared dedication to our projects helped me learn the importance of teamwork and how different perspectives can lead to innovation.

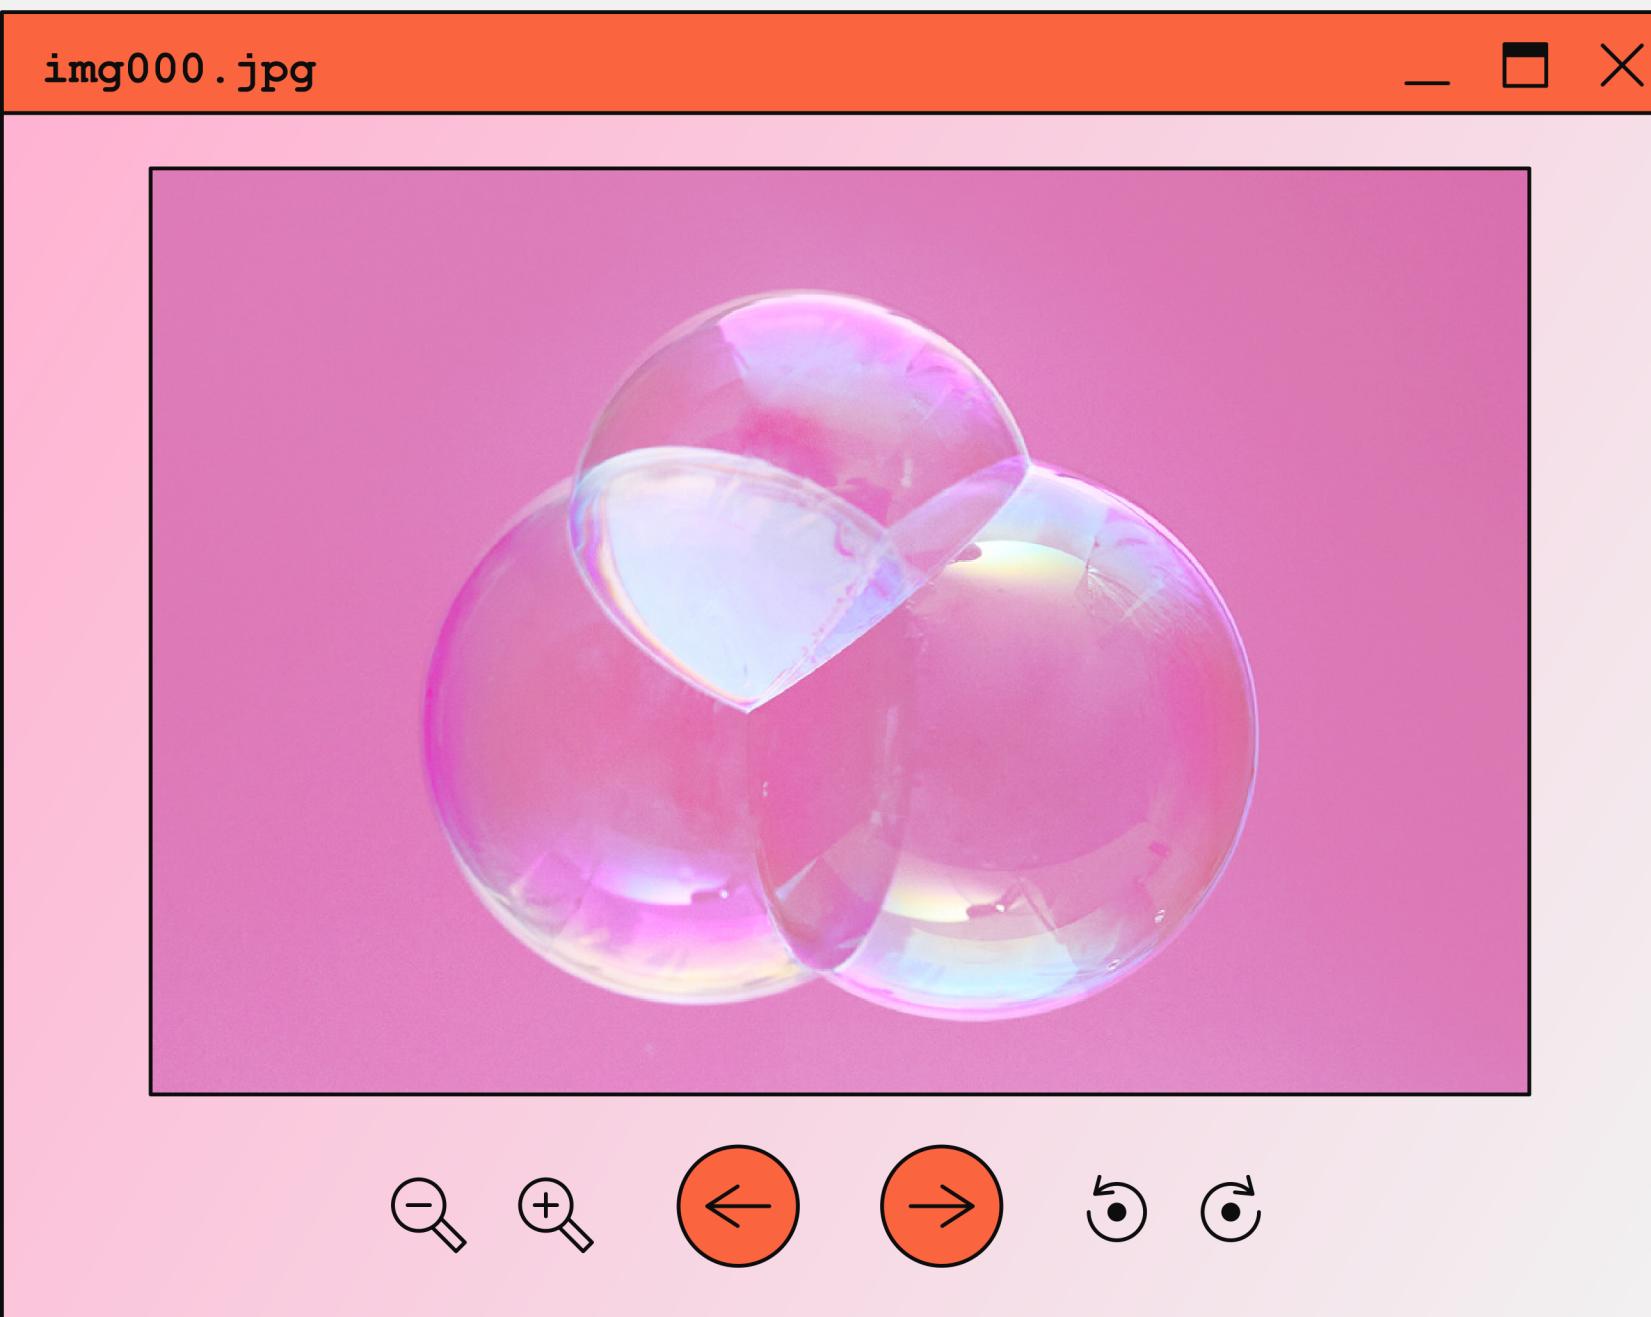

I also want to acknowledge the numerous websites, forums, and resources that I turned to for solutions and inspiration. The online coding community is a vast and generous one, and I am thankful for the open-source projects and tutorials that made my journey smoother.

As I move forward in my coding journey and beyond, I will carry the lessons learned and the relationships built during this time. I am excited about the possibilities that lie ahead and am grateful to each of you for helping me lay this strong foundation in app development.

Thank you once again for being an integral part of my journey, and I look forward to continuing to make you proud in the future.

Name: Izabella Faye Lebig

Age: 14

Grade: 9

I love the thrill of solving problems and creating innovative solutions using code. Whether it's web development, app design, or exploring the latest programming languages, I'm always eager to learn and take on new challenges.

My Journey With Clevered

Page 1

Words: 88

MY JOURNEY

During my internship with Clevered, I embarked on an exciting coding journey that opened my eyes to the world of technology and software development.

From day one, I was immersed in real-world coding projects and learned to apply my classroom knowledge to practical situations.

The Clevered team provided me with valuable mentorship, guiding me through the intricacies of programming languages and software development processes.

MY JOURNEY

I had the opportunity to work on a variety of projects, from web development to app design, and even dabbled in some data analysis.

This internship not only improved my technical skills but also taught me the importance of teamwork, problem-solving, and attention to detail in the fast-paced world of tech.

I'm grateful to Clevered for this incredible learning experience and can't wait to continue my coding journey in the future.

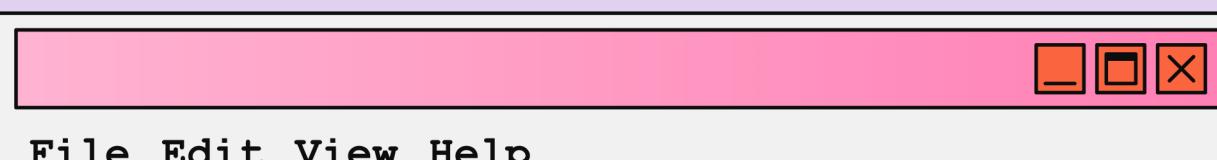

The screenshot shows a slide with a light blue header containing the text 'About Story Generator AI'. Below the header is a large, bold, black title 'About Story Generator AI'. To the right of the title is a white mouse cursor icon. At the bottom of the slide is a navigation bar with icons for back, forward, and search, along with a zoom level of '100%'.

The screenshot shows a 'COLOR' tool interface. At the top, there are three color swatches (purple, black, white) and a color code box displaying '#FFFFFF'. Below this is a text area with a purple-to-white gradient background. The text reads: 'Story Generator AI is able to identify flowers in images and narrate fascinating tales about them. Artificial intelligence is used in this project to identify the kind of flowers that are depicted in the images and then generate amusing and educational stories about them.' Another text area below it says: 'So, if you take a picture of your favorite flower and feed it to the Story Generator AI, it will immediately provide a tale about that flower!'

The screenshot shows a 'COLOR' tool interface with a pink-to-purple gradient background. At the top, there are three color swatches (purple, black, white) and a color code box displaying '#FFFFFF'. Below this is a text area with a pink-to-purple gradient background. The text reads: 'It uses Image Recognition AI to evaluate photographs and produce narrative descriptions. Story Generator AI blends natural language processing with image recognition.' Another text area below it says: 'The technology builds rich, relevant tales by identifying the items, settings, and emotions represented in an image using deep learning techniques.'

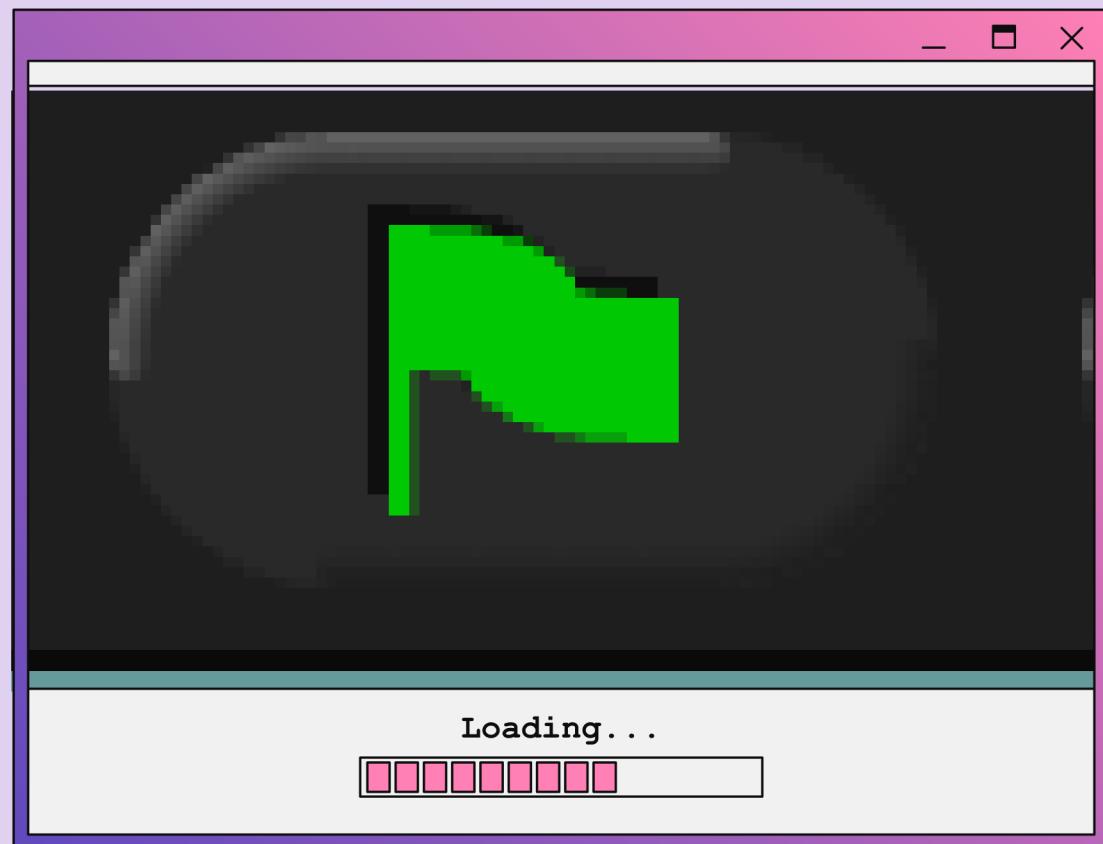

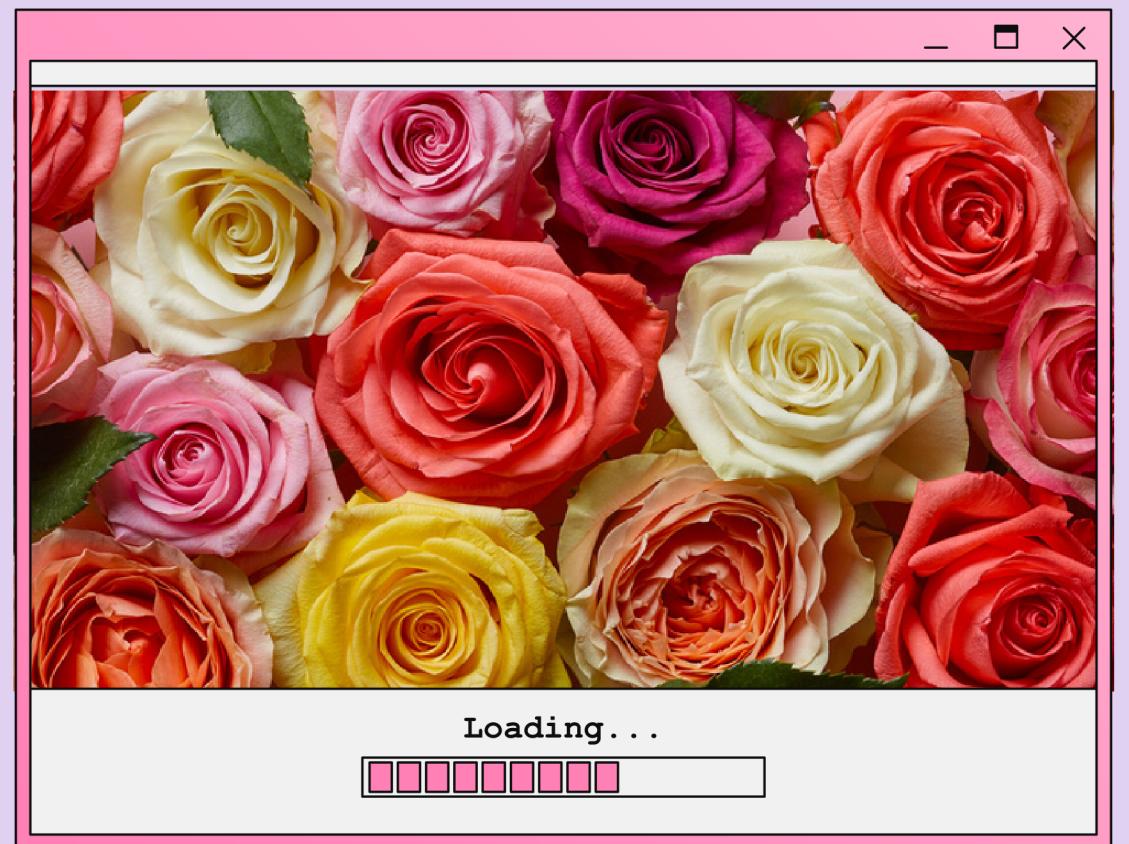

How to use Story Generator AI

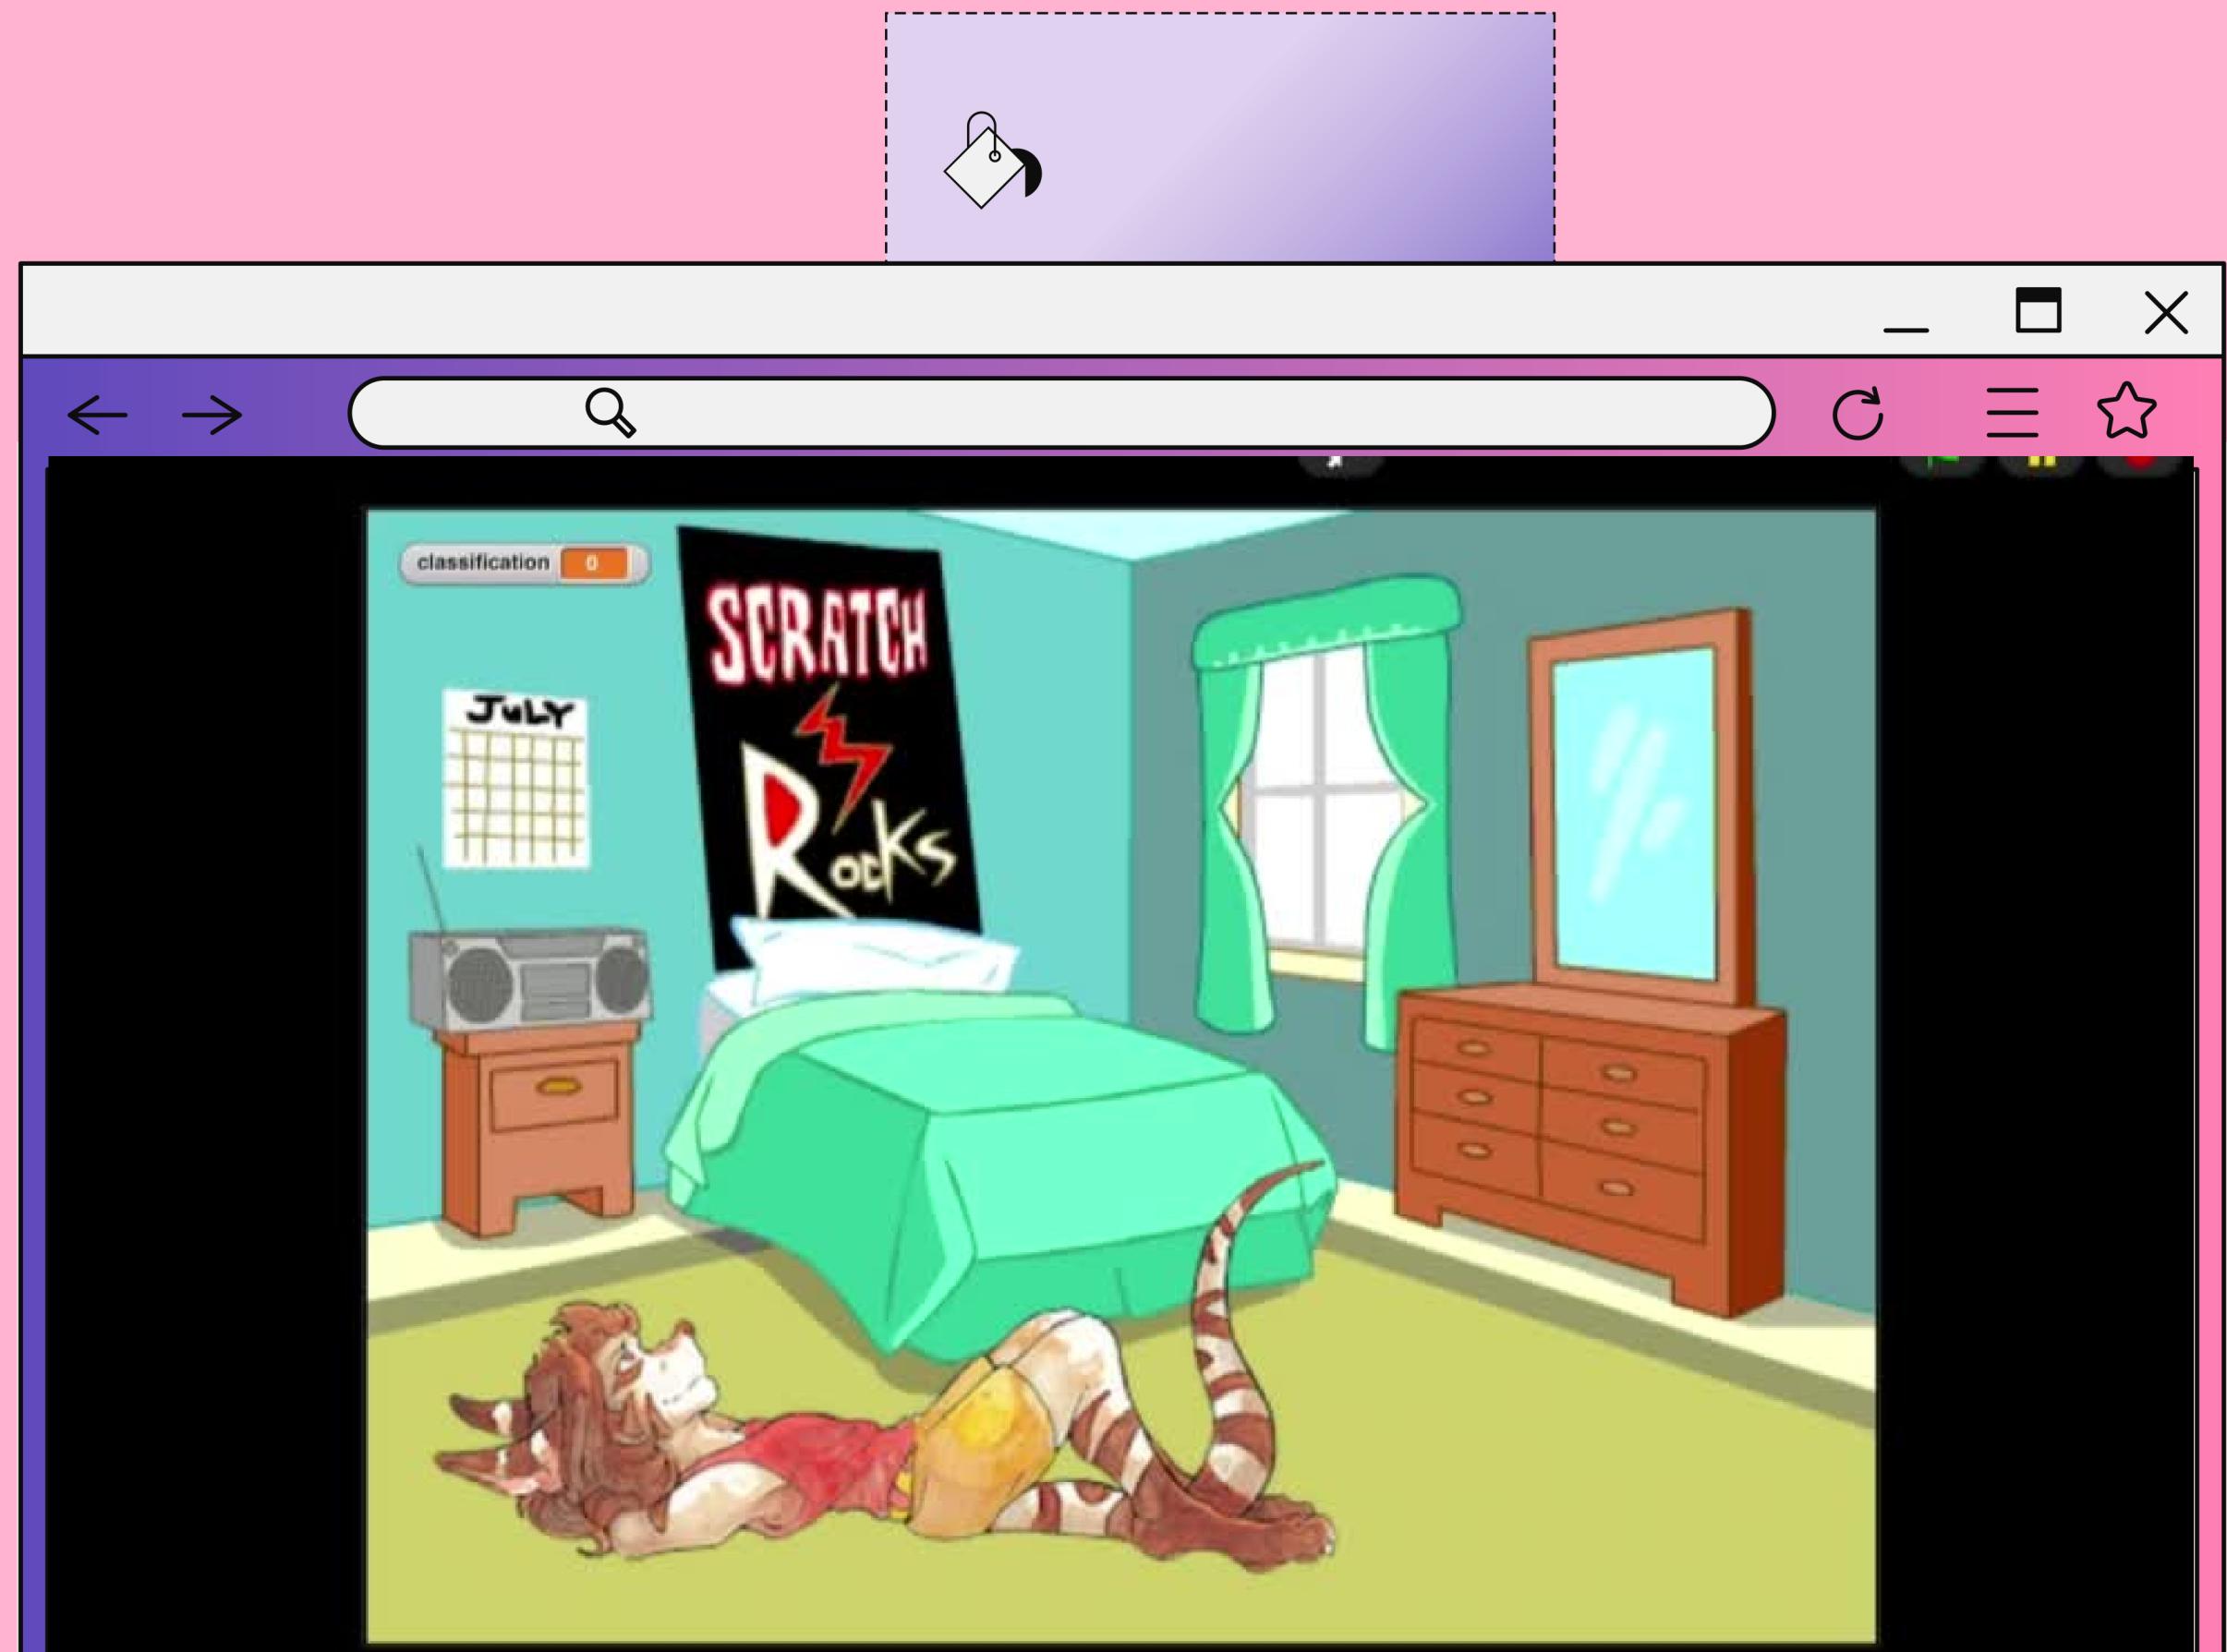

File Edit View Help

- Select an image of your favorite flower on your phone/tablet.
- On your laptop, open the Story Generator AI and click the green flag.
- A message should appear, and in five seconds hold out the picture of your flower to the laptop camera.
- The Story Generator AI will recognize the image of your flower, what flower it is, and write a story based on that flower.

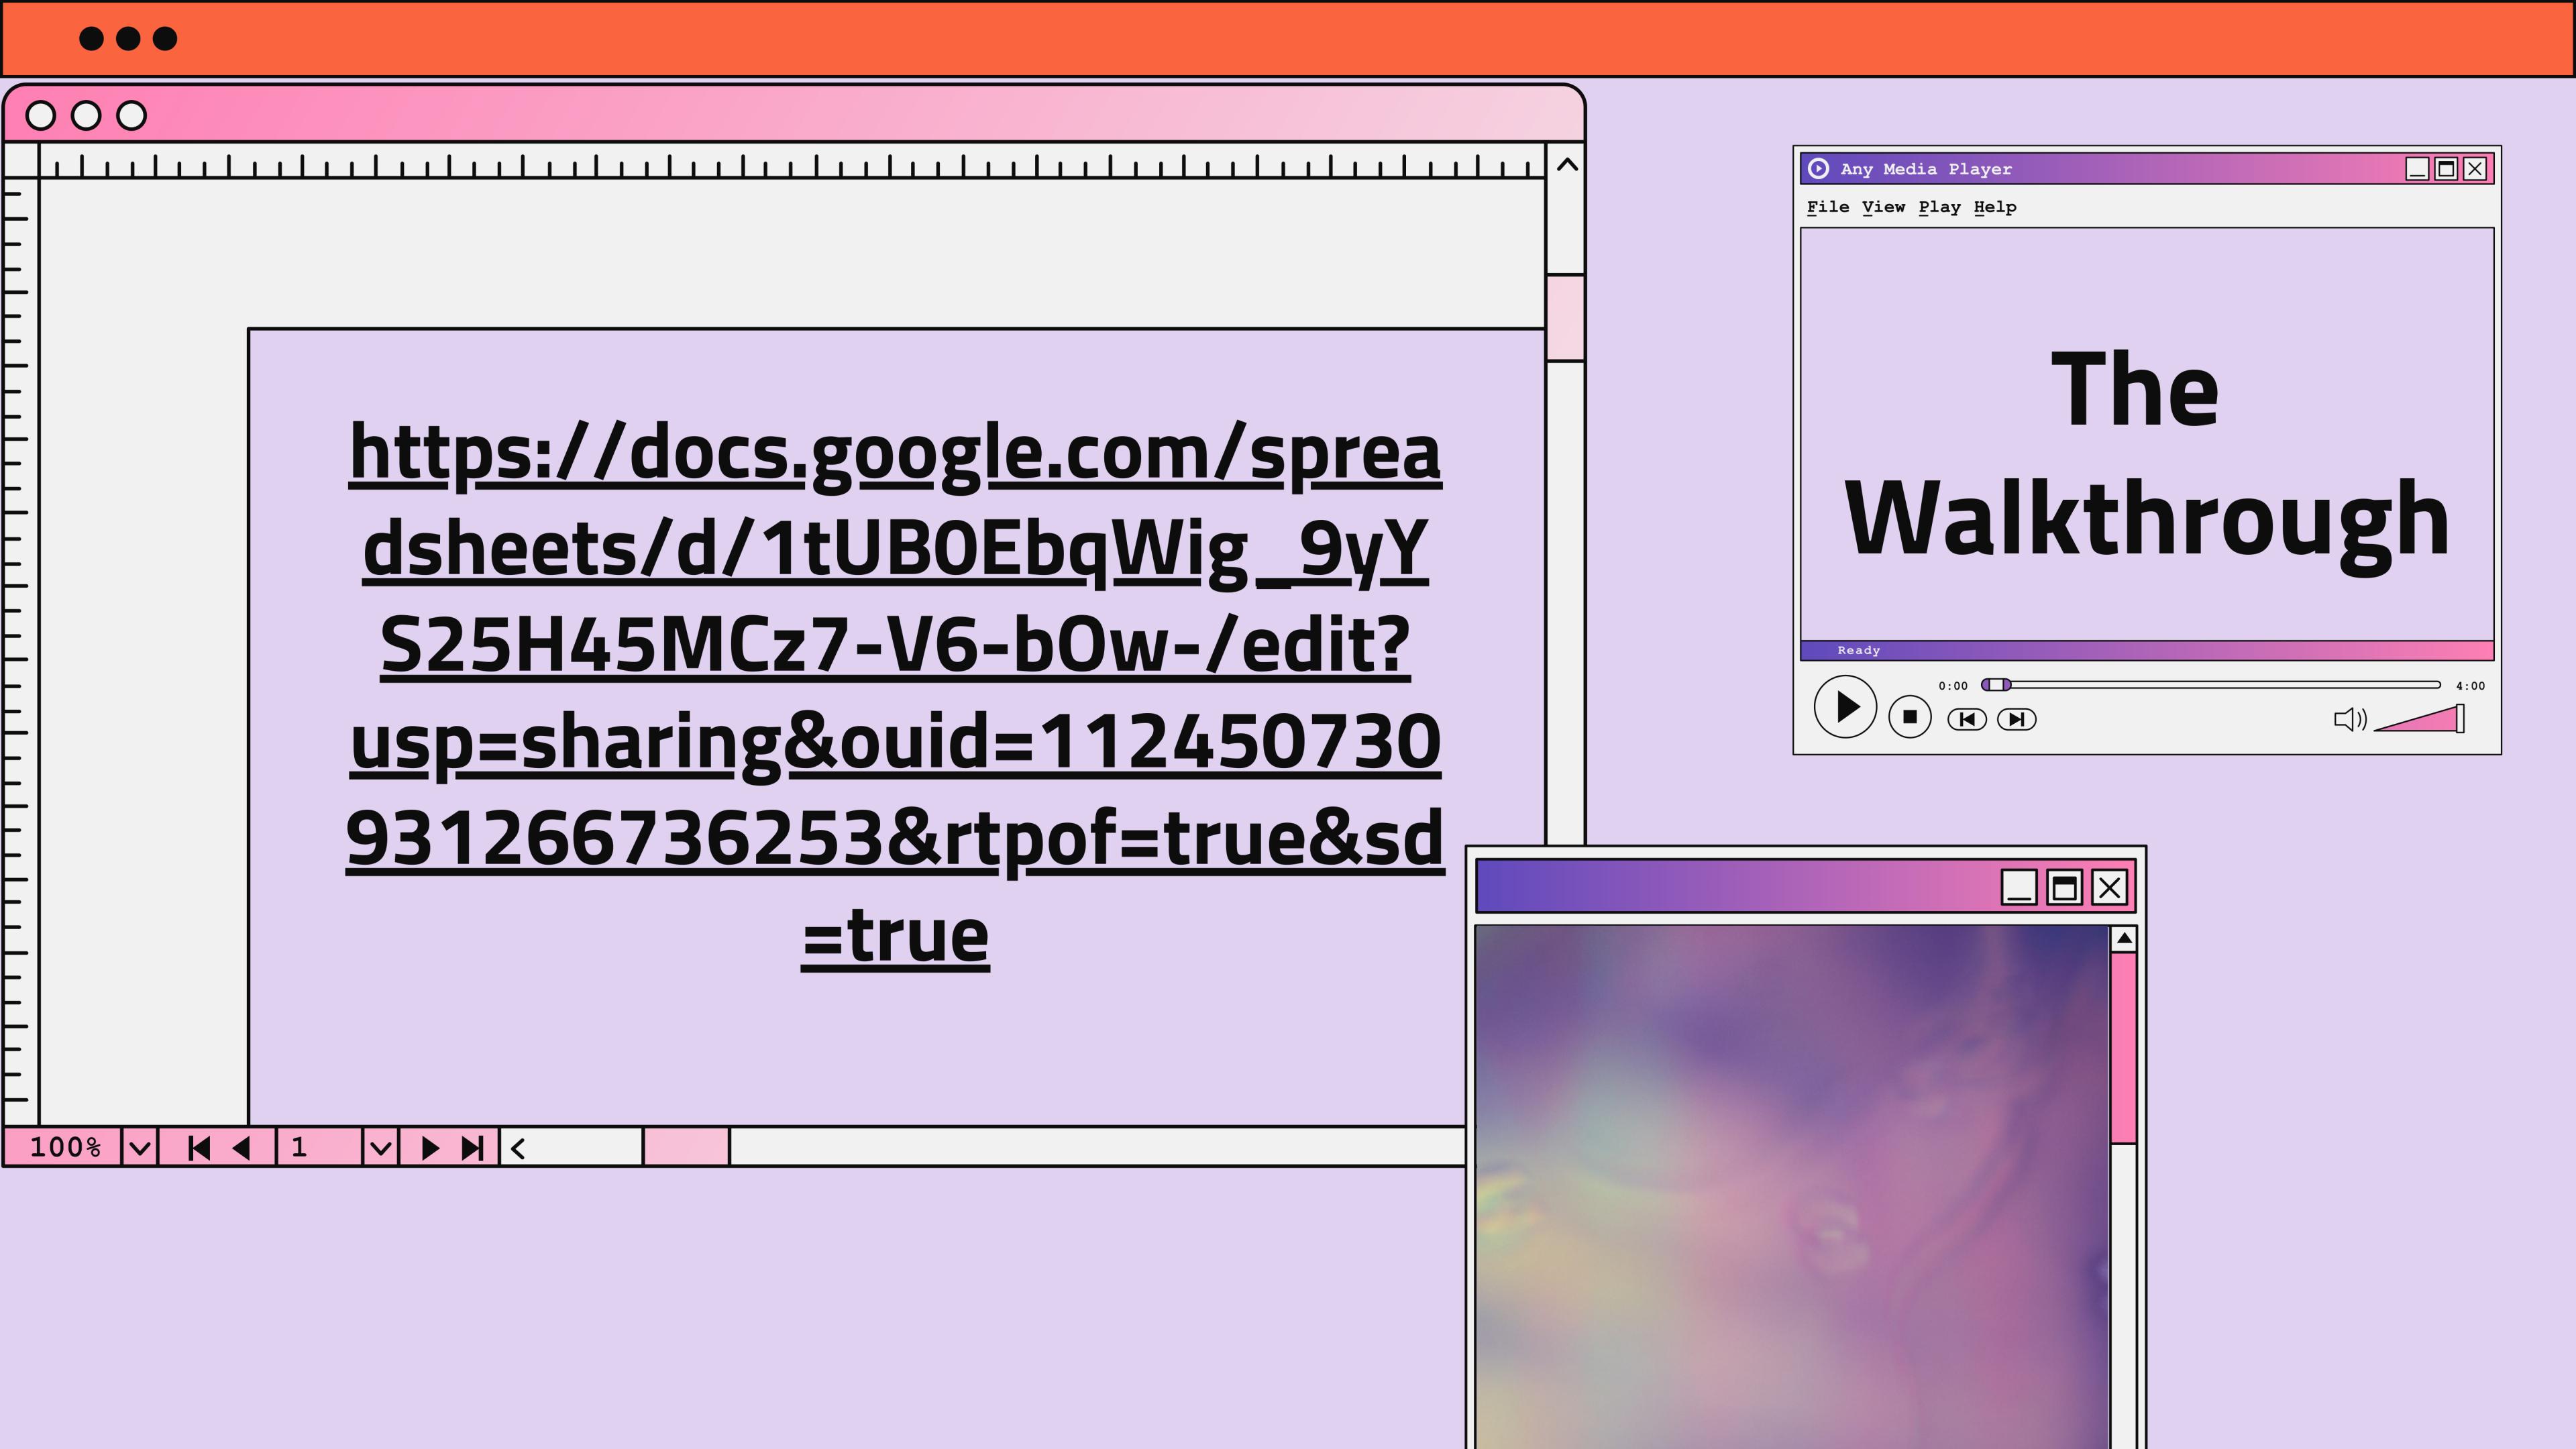

Note: When showing your picture to the laptop camera, show the full image and do not move, or else the image may be incorrectly interpreted
